

SHAKER MACHINE for parts Alignment/Assembly

VACUUM BOX "VXE-11"

• [FEATURES]

1. Ejector type vacuum generating device
2. To be used for sucking parts so as to be not fallen in the process of turning over the pallet after parts alignment.
3. Quick suction and release of parts can be done since sucking is speedy and blowing is also possible.
4. Installation just on work bench is acceptable because of compact size.
5. To be used when connected with vacuum jig exclusively made for the pallet

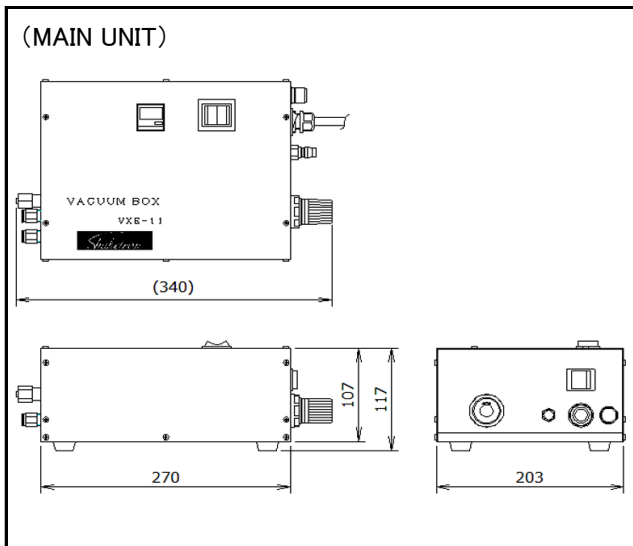

• [BASIC SPECIFICATION]

FUNCTION	VACUUM / BLOW
VACUUM SOURCE	VACUUM EJECTOR
AIR SUPPLY PRESSURE (KPa)	490
MAX DEGREE OF VACUUM (KPa)	-88
VOLTAGE RATED (VAC)	100 or 200 * 1
